Turnkey computer assessment for one-fifth the price

\$675 Examiner Express delivers assessment design, grading and analysis in one highly mobile, easy-to-use package

(ST. PAUL, MINN.) – The Examiner Corporation today released ***Examiner Express***, a full-featured computer-managed assessment system that can provide a “testing center in a briefcase,” for about one-fifth the cost of competing systems.

“Examiner Express is designed to be a complete, turnkey assessment system for cost-conscious educators and assessment specialists,” said Gary Brown, CEO of The Examiner Corporation.

“This is literally a plug-and-play solution for testing,” he added, “It contains everything—hardware and software—that a teacher needs to quickly build assessments, grade them and deliver sophisticated reports. Add a notebook computer and you have a fully portable testing center that can be easily shared between classrooms.”

The \$675 package integrates tools from the company’s proven assessment system, ***The Examiner***, with the innovative ACP 100 optical mark reader (OMR) manufactured by Chatsworth Data Corporation. Compact, fast and accurate, the ACP 100 lets teachers scan and grade paper-and-pencil test forms as fast as 30 tests per minute.

Examiner Express makes it easy to design meaningful assessments, and provides powerful analysis tools that allow assessors to chart progress by class or individual student.

Examiner Express requires a Microsoft Windows XP, Windows Vista or Windows 7 computer with one free USB port for the OMR scanner.

About The Examiner Corporation (St. Paul, Minnesota)

Founded in 1985, The Examiner Corporation delivers computer-managed assessment systems for education, business and industry. Its award-winning ***The Examiner*** assessment tools, developed by psychometricians, provide powerful testing design and analysis in a remarkably easy-to-use package.
